SUMMARY

Recent graduate with a degree in BCA and a passion for creating responsive and interactive web applications. Proficient in HTML, CSS, JavaScript, and framework like React. Experienced in using version control systems (Git), implementing responsive design principles, and optimizing web performance. Strong problem-solving skills, keen attention to detail, and a collaborative mindset. Eager to contribute to dynamic development teams, leverage modern front-end technologies, and grow in a supportive, innovative environment.

PROJECTS

OMNIFOOD | HTML, CSS [\(Live Demo\)](#)

- This is a responsive food delivery landing page created using **HTML** and **CSS**. The purpose of this project is to showcase my front-end web development skills and provide an example of a visually appealing and interactive website.

FAR AWAY | HTML, CSS, JAVASCRIPT, REACT [\(Live Demo\)](#)

- Far Away is a travel list website that allows you to create and manage your packing list for your upcoming trips.
- This project is built using **css** and **React**, a popular JavaScript library for building user interfaces

USEPOPCORN | HTML, CSS, JAVASCRIPT, REACT, API [\(Live Demo\)](#)

- UsePopcorn is a **React** application that provides users with a way to explore movies, rate them, and manage their watched movies list.
- I have used advanced **React.js** concepts to build this. It uses the **useState** and **useEffect** hook and react forms and controlled components. The components are made from scratch including the starRating component.

MINI PROJECTS

GUESS-MY-NUMBER | HTML, CSS, JAVASCRIPT

- GuessMyNumber is a **JavaScript** game in which the user has to guess the correct number between 1 and 20.

PIG-GAME | HTML, CSS, JAVASCRIPT

- A PigGame is a simple dice game with two players. Each player repeatedly rolls a die until either a 1 is rolled or the player decides to "hold". The player who first scores 100 or more points wins.

EAT AND SPLIT | HTML, CSS, JAVASCRIPT, REACT

- Eat and Split is a Bill Split Calculator application in which we can share bill with your friends and calculate the Individual bills.

PIZZA-MENU | HTML, CSS, JAVASCRIPT, REACT

- Simple pizza ordering web application built with **React.js**. Browse through a menu of delicious pizzas, view details, and place orders seamlessly. Demo uses static data for illustration purposes.
